

TECHNICAL DATA SHEET

IMPREGNATE WET CUBE

- Wet ankle effect
- Invisible protection
- Easy application
- Vapour-permeable
- Brings out the natural colour of the substrate

Colour: Clear

Capacity: 800 ml

IMPREGNATE WET CUBE is an aqueous solution based on an innovative technology of fluoropolymers, silanes and silcosanes. Thanks to its formula without organic solvents, it is safe for both the user and the environment. Designed to protect a variety of building materials, including paving stones, natural stones, terracotta, concrete, bricks, etc. It guarantees a durable and transparent protective barrier, providing water and oil resistance, which effectively protects surfaces from absorbing water, grease and dirt. In addition, the impregnation provides protection against stains from oils, coffee, juices, wine, etc. Its water vapour permeability properties allow the substrate to "breathe", which makes it suitable for both indoor and outdoor applications. The most important feature of this product is that it enhances the colour of the surface, does not yellow and does not form a coating. In addition, the wet paving effect can also mask minor surface imperfections, giving them a uniform and aesthetic appearance. This is particularly beneficial in the case of old or faded paving stones, which thus regain their original shine and colour.

HOW TO USE:

- › The surface to be impregnated should be dry, clean and free of grease. Before impregnation, it is essential to remove all dirt, greasy stains, tarnish and efflorescence.
- › Immediately before impregnation, mix the product thoroughly. Do not dilute. Always perform a test on the ground.
- › The substrate should be impregnated with a brush, roller or spray, until it is saturated by applying one or two coats using the "wet on wet" method.
- › Do not apply an excessive amount of the preparation to the substrate, remove the excessive amount before drying.
- › On vertical surfaces, apply from bottom to top.
- › The drying time is about 4 hours and depends on the conditions at the place of application (temperature and humidity).

ADDITIONAL INFORMATION:

- › Optimal application conditions: temperature from +10°C to +30°C and relative humidity below 70%.

TECHNICAL DATA SHEET

IMPREGNATE WET CUBE

- › Initial surface protection after 24 hours. Full protection after 7 days, do not clean the impregnated surface until then, protect against water and dirt as well as mechanical damage.
- › Mild detergents should be used to care for the impregnated surface. Do not use rough sponges.
- › Clean up spills from the impregnated surface immediately. Prolonged contact of spilled liquids with the impregnated substrate may result in minor discoloration.
- › It is recommended to re-impregnate the surface after 1 year.
- › Wash the tools with water and detergent immediately after painting.

EFFICIENCY:

- › 10-30 m²/l, depending on the method of application, and in particular on the type and degree of absorbency of the substrate. Efficiency given for one layer.

NUMBER OF LAYERS:

- › 1 to 2 layers, depending on the type and degree of absorbency of the substrate.

SHELF LIFE:

- › 36 months from the date of production. Once opened, use within 6 months.

TRANSPORT AND STORAGE:

- › Store and transport in airtight, original packaging at a temperature of +5°C to +40°C. Protect from frost.

COMMENTS:

- › Keep out of reach of children.
- › If swallowed, consult a doctor.
- › VOC content limit (cat. A/h/WB): 30 g/l. The product contains max. 30 g/l.
- › It contains 1,2-benzisothiazol-3(2H)-one. May cause an allergic reaction.
- › Detailed safety information is provided on the product packaging and in the Safety Data Sheet.

The data contained in the technical data sheet is based on laboratory tests and practical experience and is communicated to the best of our knowledge in order to ensure optimal use of the product. These data are not the basis for the legal liability of the Manufacturer, as he has no influence and control over the conditions of use of the product. The manufacturer reserves the right to change the information contained in the card without prior notice to the Customer.
